

PRECISION IN SHIPPING, PASSION FOR LOGISTICS.

WHO WE ARE

7 Worldwide Logistics (7WL) is an allrounder in the global logistics industry with a special focus on project logistics and cross trades.

Our experienced team provides a high level of services covering all aspects of modern special projects logistics.

ABOUT OUR COMPANY

Our german office is located in Bremen.
We also operate through the network of our partners all around the world.

Over the years we have mastered solutions for all kinds of cargos including breakbulk, heavy lift, out-of-gauge, RoRo and more.

We also deal on a daily basis with chartering partial or full cargoes, heavy-lift-ships, coasters and special vessels.

LAND FREIGHT

We offer all kinds of land freight solutions including road and railway transportation.

We specialize both in general cargo and project cargos. Whether these are wind blades, out of gauge cargoes, heavy machinery equipment or even entire bridges we are able to assist and provide our services.

We provide worldwide solutions taking into consideration time efficiency, cost saving and local specifics.

SEA FREIGHT

Our sea freight offer includes pre-carriage and on-carriage by truck, barge and rail.

We take care of all customs clearance and customs formalities as well as packing for any kind of cargo. We also organize warehousing, loading and unloading of containers as well as transport insurance for you.

Take advantage of our comprehensive logistics consulting!

AIR FREIGHT

**You think it can't fly?
We make things happen!**

We are helping our clients with all sorts of air freight cargos. Whether it is a small express shipment or large scale projects.

Our air cargo expert team offers customized solutions. Our team members have experience in shipping oversize cargo that require lots of dedicated planning.

We offer both full air charters as well as partial cargo charters and we make sure that our shipments are handled with the optimal care.

We take advantage of a network of our partners worldwide who take care of the freight both on a local and global scale.

BARGE SERVICE

We also feel comfortable with smaller vessels!

We have a long-lasting experience with any kind of barge services for heavy lifts and out of gauge cargoes, may it be a normal barge or a ro.ro-barge.

Barging is the eco-friendly, reliable and fast service and no road-permissions are needed, no obstacles have to be overcome on the road, so it's THE choice in many cases.

SPECIAL SERVICE & INDUSTRIAL RELOCATION

Industrial relocations are unique, so are our services!

The relocation of used industrial plants is a growing segment of global logistics. These projects not only require a high level of professional experience but also close relationships with the involved companies.

Accuracy in dismantling and reassembly is a key factor in a successful relocation process. Our experienced team for over 10 years has completed projects with a size of up to 150.000 freight tons globally.

PROJECT CARGO

Apply our precision to your unique projects!

Our team has been active in this particular area of logistics for many years. We are proud of our achievements that position us highly on a global logistics market. We have completed numerous activities such as container projects for the solar industry, global relocations of industrial plants or complex delivery of mining solutions.

We specialize in various fields including but not limited to power, wood-processing, petrochemical, chemical and fossil fuels industries.

CONSULTING

You know what you want, together we'll find the solution!

We work out logistics concepts of any kind, whether for big or small special projects.

We have team members with already 48 years of dedicated worldwide experience in various fields of logistics. This includes customised IT-solutions adjusted to specific customer's requirements.

In our team we also have some long-time-experienced experts who have worked for many years as responsible managers for various industries. They are aware of the specifics of the industry as well as expectations and requirements set by ordering parties.
